

MX MILLS EXTREME TARGETS

Short Bit & Tool Co.
225 Gold St
Garland, Texas 75042
972-205-1011

MX Mills are matrix bodied with blades that are deep-set with about 25% by volume diamond grit. These mills have been used to diamond-grind various targets materials; carbide, loose carbide junk, case hard slip wickers and slip jaws, icon 718, incoloy 925, as well as common 4140HT steel. These run with low torque with light WOB and medium to high RPM, creating particle sized cuttings.
